Lesson 05

Django Framework

➔ Django Forms

1. Using the project and the data model used in past lessons (Authors, Publishers and Books), re-create the functionalities created before, but using Django Forms, this time.

➔ Authentication and Authorization

2. Create the login and logout functionalities as shown in the slides.
3. Protect the operations, created before, in order to be used only if some users are authorized.
   For testing purpose, create some users, using the Django Admin Site.
